

Custom Labeling Services

Improving the Inventory Management Process

Ellsworth Adhesives understands the value custom labeling brings, and clear/accurate data combined with proper label placement are important to a customer's process. To accomplish this, Ellsworth Adhesives has developed a highly integrated labeling system along with label placement standards that significantly reduces manual inputs; minimizing the risk for data entry errors and enforces best practice labeling guidelines across multiple container types.

Labeling Guidelines

Ellsworth Adhesives avoids covering lot specific, instructional, hazardous information, or apply labels to lids. Labels are placed near the top of the container when possible.

GHS pictograms are never covered.
