- Clean any connector, any size, any configuration, anywhere (military connectors, biconic, SCA connectors for FTTh applications, SMA 905 AIR connectors)

- Clean the entire end-face, not just the central core

- Deliver "Wet/Dry" cleaning when used with Sticklers® Fiber Optic Splice & Connector Cleaner fluid

- Ultra-clean construction - no fabric, foam, glues or particulate

- Precisely molded to an exact size and shape, for better cleaning

- Color coded labels & packaging minimize user error & speed cleaning

- Packaged in high-purity, self-sealing bags

- Military approved with National Stock Numbers

A   B

On the head of each Sticklers® CleanStixx® fibers flex and easily conform to the end-face (A). The fibers also spread apart and grip particulate, just as a radial tire grips the road (B).
Capillary action wicks liquids from the surface. Together, these two processes deliver fast, consistent cleaning results time after time. Most competing swabs have a rigid center post
beneath a softer cover, so all the cleaning pressure is on the very point of the swab, and the tip can't conform to clean the entire connector surface. They also tend to have inconsistent shapes and dimensions, cleaning the sides of the alignment sleeve better than the end-face. Drawing not to scale.
